

The Power of One

Report to the Community 2019

Our Mission

Donor Network West saves and heals lives through organ and tissue donation for transplantation and research.

Message From Our CEO

Dear friends,

Donor Network West experienced a sea change in 2019.

Our mission, simply put, is to save lives. That's it. This clear and simple mission, along with the work of our staff, volunteers and community, resulted in 92 more organ donors than in 2018, an increase in a single year that previously took 17 years to accomplish; and something that has not been done before in our country by an Organ Procurement Organization. Thank you for being part of this historic accomplishment. History is changed if even one life is saved, and together, we celebrate saving 150 more lives in 2019. We won't know for sure the impact, large or small, but history will be changed by their very presence and contributions to family and community.

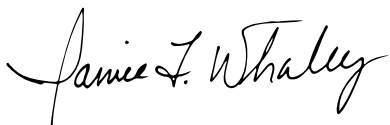

The view of trends outlined in this report are promising and portray a community in action around the knowledge and belief that saving lives represents community purpose. How else can we explain that our volunteers joyfully work to drive donor awareness and registration, our healthcare professionals work tirelessly to care for both transplant recipients and candidates, and that Donor Network West staff and hospitals throughout Northern California and Nevada spend all the time it takes to provide support, information and compassion to families who have lost loved ones? These donors and their families leave a legacy.

During this time of public health uncertainty, people are still waiting for an organ transplant. Donor Network West is focused, more than ever, on helping them. We hope that you will help us continue to educate people about the life-saving gift of donation. For your passion, work and support, we say "thank you." We also have one final ask of you. Please help us ensure that people waiting for a life-saving organ transplant donation are not forgotten.

Changing history, leaving legacies, finding and giving purpose to others. You have our deepest appreciation for being part of Donor Network West's mission and believing in the best of humanity.

Be safe. Be a donor. Save lives.

With gratitude,

Janice F. Whaley
Chief Executive Officer

***"History is changed if
even one life is saved."***

Research

The future of the treatment of type 1 diabetes (T1D) is here and Donor Network West's efforts to save lives through donation for transplantation and research is playing a vital role thanks to a collaboration with a transplant surgeon, Dr. Peter Stock of UCSF Medical Center.

T1D occurs as a result of the body's immune system destroying the insulin-producing (islet, or islets of Langerhans) cells in the pancreas. Transplantation of beta cells islets can reverse the symptoms of diabetes. However, transplants require islets from multiple donors due to a poor islet survival rate.

In May of 2019, the California Institute for Regenerative Medicine (CIRM) awarded Dr. Stock and his team \$11.08 million to conduct a clinical trial that uses parathyroid glands to aid in the success and viability of the transplant procedure. Co-transplantation of islets and parathyroid glands from the same donor substantially increases beta-cell survival, potentially enabling adequate long-term insulin production and removing the need for multiple donors.

Donor Network West has collaborated with Dr. Stock in this study since 2018 by allocating a large number of parathyroid and pancreatic samples.

This article was adapted from an original piece featured in The Stem Cellar Blog, a CIRM publication. We thank and acknowledge Dr. Peter Stock, the UCSF News Office, Kevin McCormack of CIRM, Ahmad Salehi, M.D., Ph.D. - Donor Network West Director of Research, and Nikole Neidlinger, M.D. MBA FACS - Donor Network West Chief Medical Officer

Be the Light

Michael's Story

The family of Michael Balsley-Rodriguez of Stockton, California experienced firsthand what is often referred to as the ultimate tragedy: the loss of a child.

Michael loved dogs, video games, and pranks. He also played football and dreamt of becoming a professional player. His death at age 13 brought pain and confusion, but also hope as he saved five individuals through organ donation.

"We were trying to make sense of it all and wanted to give meaning to his short life. That's why we chose donation," says his mother, Silvia.

Last December, Silvia traveled to Pasadena with her family in memory of her son whose floral portrait was featured on the 2020 Donate Life Rose Parade® Float, Light in the Darkness.

Blessed Miracle

Robert's Story

At 57 years old, Nevada resident Robert was diagnosed with Chronic Obstructive Pulmonary Disease (COPD). He suffered through repeated episodes of pneumonia which accelerated his declining health. Many visits to his doctors with compromised lungs led him to seek a life-saving option, organ transplantation.

Robert was listed for a double lung transplant at Stanford in December 2017. He waited for 18 months for the gift of lungs that saved his life. During this wait, Robert volunteered with Donor Network West as much as his body would tolerate, but he was very weak.

With a fresh breath of air, Robert is now walking and hiking a few miles at a time. He is grateful to be given the second chance at life and considers himself “a blessed miracle.”

“I’m extremely blessed and grateful to my donor.”

Robert,
Double lung transplant recipient

“Erik made this possible with his natural-born unselfishness and giving heart.”

Julie,
Erik’s mother

Photo: Erika Preciado of Ceres, CA listens to her father's heart beating inside of his recipient, Ramiro Cruz in April 2019. Photo by The Modesto Bee

Heart to Heart

Erik's Story

Erika Preciado of Ceres, California was not even four-years-old when her father, Erik Gustavo Sandoval Preciado, was killed during a botched car theft incident in 2007. Last April, the 17-year-old listened to his heartbeat in the chest of Ramiro Cruz, who received Erik's donated heart and traveled over 200 miles—from Bakersfield to Modesto—to meet the donor family.

During the meeting, Erika's grandmother and Erik's mother—Julie Sandoval—shared that her son had told her that, if anything ever happened to him, he wanted to be an organ donor. “It's OK, mija,” Julie said to comfort her granddaughter, who began to cry as she heard the rhythm of Erik's, now Ramiro's heart.

“Erik made this possible with his natural-born unselfishness and giving heart”, says Julie. Erik will always be remembered as the one who gave hope to people in great need.

Hospital Performance Data

In 2019, Donor Network West recovered 1,197 organs for transplant from 411 organ donors. In addition, 2,285 people said “yes” to tissue donation. Through the generosity of the donors and their families, partner hospitals, coroners, and funeral homes, thousands of lives were saved and improved. History has changed with every life saved.
